### PROFILE

Experienced and versatile Full Stack Developer with a solid background in the industry, offering 2 years of professional expertise. Highly skilled in both frontend and backend development, with a strong focus on delivering exceptional user experiences. Proven track record of successfully completing frontend contracts on Upwork.

### WORK EXPERIENCE

#### React Js

Dowell

2023

- Currently I'm working with Dowell company platform as a React developer.
- In this company, we are working with a team where frontend and backend developers collaborate and communicate with each other.
- I have gained a lot of experience working with this company.
- I am working on a project called Workflow AI, which is similar to Microsoft Word. It is designed to be helpful for assignments and other tasks between students and teachers.
- I have gained a lot of learning opportunities in this project, such as understanding how things work on real websites and how to debug errors when they occur.

### WORK EXPERIENCE

#### Full stack project

Amazon Clone

2023

- I recently created a clone of Amazon, and I utilized many things in it.
- I implemented all the functionalities of the cart in a functional manner, such as adding and removing products from the cart.
- I also incorporated the functionalities of login and signup. For the backend, I used Firebase.
- I also implemented a search functionality to fetch product.
- I have also used Redux extensively to manage the global state.
